Dealing with Data

Howdy! This file describes the resources available for the dealing with data course module. Should we find an error or omission, I will post a revision to this file. In total, there are 6 videos for this module. Two videos are for the presentation of course concepts, three videos serve as a class workshop to generate a stock database using the Nasdaq Data Link data service and another video provides instructions on creating an account and subscribing to a data service.

In addition to the videos, I have also provided you with a PowerPoint deck that serves as basis for the presentation of course concepts. In addition, I am also providing other files that we will access during the module that will serve as a basis for learning. All of the files and videos are available separately in Canvas. For the videos listed below, please note that the time (minutes:seconds) are provided for each video. In total there are about 1 hour and 40 minutes of video for the series of videos that comprise this course module.

1. Dealing with Data: Part 1 (7:58)
2. Dealing with Data: Part 2 (29:15)
3. Create a Nasdaq Data Link Account and Subscribing to a Data Service (4:10)
4. Create a Stock Universe: Part 1 (19:17)
5. Create a Stock Universe: Part 2 (13:29)
6. Create a Stock Universe: Part 3 (10:46)

Finally, I know that I cannot possibly cover all the material, make it perfect, and deliver it in a fashion that is readily comprehensible to everyone. Undoubtedly, I will miss a few things or you may find an error (for example a broken link). I ask you to please reach out to me and let me know so that I can take corrective action. As always, my goal is to make this as easy and as painless as possible for you.
